

SIGNET'S SUSTAINABLE PACKAGING SWAPS

With consumers becoming **environmentally conscious** in their purchasing decisions, more businesses have been switching up their packaging to **sustainable alternatives**. To help you shift your supply chain to an eco-friendly ecosystem, we've paired these traditional packaging products to their **greener alter-ego's**.

Did you know?
Over five million tonnes of packaging waste was generated in Australia last year and only half of this was recycled.

Packaging Tape
