

# Bridget Bodenham

**Signet provided a sustainable packaging solution for Australian ceramic artist Bridget Bodenham, reducing plastic use by 99% while also improving packaging efficiency by 40% and decreasing product damage during transit.**

Bridget Bodenham is an Australian ceramic artist specialising in handcrafted homewares and jewellery. With over 15 years of experience, she has built a loyal following – selling her work to customers around the world via her eCommerce store, and to local supporters at markets near her rural home in Victoria.

Over the years, Bridget has carefully refined her packaging process to ensure her uniquely sized ceramics arrive safely – minimising breakages and keeping her environmental impact front of mind.

*"Our website leads with 'A timeless piece of craftsmanship is the ultimate connection of the human and natural world', so, it should be of no surprise that our impact on the environment is important to us. However, as my pieces are crafted ceramics, I've needed to strike the*

*perfect balance between my efforts towards sustainability and providing adequate protection on orders."* – Bridget Bodenham, Artist and Founder.

Before Signet, Bridget would source her packaging from more than three different suppliers, which, due to her rural location would often take weeks to arrive, holding up shipping and complicating her packaging process.

*"Working to streamline our supply chain, I sought a packaging partner that could reliably deliver everything we needed. After a successful Google search, I came across Signet, which appealed to me for several reasons. The key deal makers for us were Signet's fast shipping times to our rural location, they also had an extensive range of sustainable packaging available in different levels of durability, shapes and sizes. We now order everything through Signet, which arrives within two to three days!"*

In addition to the immediate improvement in packaging supply, Bridget noticed a reduction in her packing time and product loss due to damages in transit.

*"With Signet, we've seen an increase in our packaging efficiency by 40% and have significantly reduced incidences of breakages in transit, mostly due to the variety of boxes on site, which I can order to suit each of my unique designs. We've also been able to make our packaging 99% plastic-free, better aligning our packaging with our ethos."*

Bridget and her team utilise a wide variety of Signet's 100% recycled **Shipping Cartons** and **Mailing Boxes** to send their orders. Each handcrafted piece is first wrapped in Signet's acid-free Tissue Paper, then cushioned with Void Fill to secure it within the carton. The package is then sealed with Signet's Fragile Tape – a water-based acrylic tape that helps cartons stand out and ensures safe handling during delivery.

*"The shift to Signet has been an absolute game-changer for our small business, streamlining our packaging and packing flow, giving us more time to focus on the brand and designs!"*

Signet is proud to support Bridget Bodenham and over 60,000 other Aussie ventures.

# Corrugated Cardboard Flutes

Corrugated cardboard is constructed from one or more fluted cardboard sheets sandwiched between two flat liner boards. The thickness and strength of the cardboard is dependent on the size of the flutes, the properties of the papers, and the number of flute layers within the board.

## E Flute

- Single wall
- 2–2.5mm thick
- Used for small cartons
- For light-weight items

Customer Case Study

# Wood Grain Designs

Wood Grain Designs ships 99% damage free with Signet's eCommerce Packaging Range.

In 2019, Brett Pheeney found his calling – turning pieces of neglected and unused timber into something beautiful. With over 25 years in the timber industry and a need to unleash his creativity, Brett started Wood Grain Designs. What began as a hobby, blossomed into a thriving business, specialising in bespoke resin and timber tables, cutting boards, and a variety of other handcrafted pieces.

As Wood Grain Designs' popularity grew, Brett and his wife/business partner, Robyn, made a deliberate shift towards sustainability. They set out to give the business a clearer sense of purpose, driven by a commitment to preserving the natural beauty of their surroundings, reducing waste, and crafting functional, one-of-a-kind pieces.

Before discovering Signet, Brett and Robyn relied on standardised boxes and plastic void fill for their packaging, a process that was both time-consuming and inefficient.

They spent valuable hours cutting boxes to the right size, only for them to tear easily during transit, leaving their products vulnerable to damage. Recognising the need for a better solution and driven by their commitment to reducing environmental impact, Brett and Robyn set out to upgrade their packaging process.

*"I was having so much trouble trying to cut down the sides of boxes, they never folded properly, and they weren't sturdy enough for our products. It also didn't make sense that we were making our products from sustainable sources, and the packaging didn't match this."* – Robyn Pheeney, Co-Owner, Wood Grain Designs.

While browsing online, Robyn discovered Signet and decided to try the **Adjustable Shipping Cartons**. Impressed by how easy they were to use and how much time was saved, Brett and Robyn haven't looked back since.

*"The Adjustable Cartons are great quality – they deliver our products all over Australia safely. They also save us so much time as we don't have to cut down boxes anymore."*

Wood Grain Designs now uses **Signet's Adjustable Shipping Cartons** to package their orders, paired with FillPak® TT Paper as a plastic alternative void fill to safeguard their items during transit.

**Signet's Adjustable Shipping Cartons** are 100% recyclable and made from recycled materials. Signet's FillPak® TT Paper is a 3D void fill solution made from 100% FSC® Certified paper. It's climate neutral, recyclable, biodegradable, and designed to protect even the most fragile items during transit.

*"Since switching to the FillPak® Paper, we've cut down damages in transit to only 1%. We've also eliminated a lot of plastic as you don't need any other protection in the carton."*

Signet is proud to support Wood Grain Designs and over 60,000 other Aussie ventures.

DISCOVER GEAMI!

Have you thought about making the switch to a paper protective packaging solution?

As an alternative to bubble wrap, Ranpak's Geami (Gee-ah-me) WrapPak design expands die-cut paper into a honeycomb structure that securely wraps and protects your products. Due to its interlocking design, there is no need for tape, cutting both time and costs.

Ranpak Exbox Mini
