

# BrewDog Brewery

**BrewDog Brewery reduced plastic usage by 15% with their new pallet wrapping solution, achieving an 18% better yield on every roll.**

International craft brewery BrewDog has been shaking up the Aussie craft beer scene since landing on our shores in 2019. Today, they're a well-known name in the local industry, with award-winning beers, five community-focused venues across Brisbane, Melbourne, Sydney, and Perth, and a nationwide distribution network.

With BrewDog's growing popularity came increasing distribution challenges. Their Brisbane taphouse and brewery ship up to twenty pallets of product weekly and brew an impressive 10,000 hectolitres annually. BrewDog had relied on a labour-intensive process of manual pallet wrapping, using a handheld wrapping machine. While this approach was effective for smaller operations, it soon became inefficient as demand grew.

*"We were wrapping all our pallets by hand. This was very labour intensive and was also giving us an inconsistent wrap."*  
– Peter Quinn, BrewDog Packaging Manager.

Recognising the limitations of their current distribution process, BrewDog needed a more scalable and efficient solution. To solve the challenges BrewDog was facing, Signet recommended a more automated solution that included the **Y-GEN-8 2000B Pallet Stretch Wrapper** and downgauging to **Signet's Own Cast Machine Pallet Wrap**.

Signet's **Y-GEN-8 2000B Pallet Stretch Wrapper** was a game-changer for BrewDog's warehouse operations. This semi-automatic machine is specifically designed for bigger operations and getting the most out of each roll of pallet wrap, safely stretching it up to 200% of its original yield. Key features like an automatic cutter, adjustable turntable speed, film carriage speed, and top/bottom wrap settings allowed them to wrap pallets consistently and efficiently, ensuring full protection for their products and reduced plastic wastage.

Alongside the machine wrapper, BrewDog adopted **Signet's Own Cast Machine Pallet Wrap**, downgauging from a 20um film to a 17um film, significantly reducing their plastic usage. This high-quality wrap offered extra stretch and tension, giving

BrewDog the benefit of a tighter, more sustainable and secure wrap without compromising on stability or quality. *"It gives us a consistent wrap every time and is also reducing our plastic by giving us a better yield out of each roll by stretching it".*

The **Y-GEN-8 2000B Pallet Wrapper** and **Signet's Cast Machine Pallet Wrap** have helped BrewDog boost productivity, meet growing demand, and reduce environmental impact – while ensuring their craft beers arrive in perfect condition.

Signet is proud to support BrewDog and over 60,000 other Aussie ventures.

Ultimate Film

The alternative to pre-stretch and conventional films

ULTIMATE FILM

How does it work?

Five simple steps to apply Ultimate Film correctly.

1 Attach film to the load and pull back (approx 250cm) to begin your revolutions.

2 Allow the film to unwind freely as you walk towards one of the corners of the pallet.

3 Hold the film parallel with the corner of the pallet, locking it with the palms of your hands or thumbs.

4 Stretch the film by 30–50%, feeling the tension, before wrapping it around the corner.

5 After stretching the film, step around the corner with the tension still applied to prevent puncturing or tearing. Then release and let the film unwind freely.

Advantages

- Lightweight rolls
- Less film needed per pallet wrapped
- Thinner gauge with superior strength
- Increased load integrity
- Reduces film use by up to 20%, lowering environmental impact

ULTIMATE FILM

Ultimate Hand Film

- High-performance pallet wrap utilising advanced resin technology for improved reliability
- Cost-effective alternative to conventional cast, blown, or pre-stretch films
- Easily hand-stretched with 30–50% tension at the stretching point
- Weighs less than conventional film, reducing fatigue during application
- Uses up to 20% less film per pallet, minimising environmental impact
- Delivers the same performance as higher gauge films at a lower cost
- Suitable for light to medium-weight products and pallets without sharp or protruding edges
- Carton includes 2 × free roll holders

PRICE PER ROLL

Item No.	Description	Size (W × L × Gauge)	Carton Qty	1 Carton	2+ Cartons	5+ Cartons

- Butterfly wrapping

ULTIMATE FILM

Ultimate Hemmed Film

Item No. 47525

- Designed with reinforced edges (or hemmed edges) on both sides, providing superior tear resistance, improved load containment, and enhanced pallet safety during transit
- Alleviates back arching and minimises user fatigue
- Better memory with stiffer wrapping characteristics
- Thin and lightweight, less wrapping per pallet
- Size: 420mm × 920m × 5um
- Each carton contains 6 rolls
- Carton includes 2 × free roll holders

PRICE PER ROLL

	SAVE 10%	SAVE 15%
1 Carton	\$1586	\$1428
2 + Cartons	\$1428	\$1349

## Ultimate Hand Film – Black

Item No. 21472

- High-performance pallet wrap utilising advanced resin technology for improved reliability
- Opaque film safeguards valuable or confidential items during shipping, reducing the risk of theft
- Size: 500mm × 400m × 11um
- Each carton contains 6 rolls
- Carton includes 2 × free roll holders

## Cast Hand Pallet Wrap

- Cast polyethylene stretch film secures pallets, ensuring water resistance and stability during transport or storage
- Greater stretch yield uses less film without sacrificing tension or strength
- Increased clarity, allowing barcodes to be scanned through the film
- Unwinds quietly compared to blown stretch film
- Carton includes 2 × free roll holders

PRICE PER ROLL					SAVE 10%	SAVE 15%	SAVE 17.5%

## IT'S AS CLOSE TO MACHINE WRAPPING AS YOU CAN GET BY HAND

The Signet Bolt combines an innovative hand wrapper and a powerful 5um pre-stretched film to deliver a consistent, machine-like wrap tension and a more sustainable film solution.

The ultra-lightweight wrapper and easy-to-use tensioning system makes achieving a perfectly wrapped pallet every time a sure thing... so you can wrap like a machine.

Scan the code to discover how to wrap like a pro with the Signet Bolt

## Signet Bolt Stretch Film

Item No. 21497

- Technologically advanced 5um cast film
- More sustainable than traditional hand films
- Pre-stretched film
- Soft air-wound and hemmed edges reduce roll damage
- Lightweight (Film 0.86kg + Core 0.12kg)
- Size: 390mm × 480m × 5um
- 8 rolls per carton
- Use with Signet Bolt Dispenser (Item No. 21510)

PRICE PER ROLL	SAVE 10%	SAVE 15%
1 Carton \$13 <sup>75</sup>	2 + Cartons \$12 <sup>38</sup>	5 + Cartons \$11 <sup>69</sup>

## Signet Bolt Pallet Wrapper

Item No. 21510

- **Consistent Wrap Tension**  
The Signet Bolt's easy to use tensioning system helps you achieve consistent wrap tension every time
- **Plastic Reduction**  
The advanced 5um pre-stretched film provides incredible pallet stability and protection while using significantly less film
- **Improved OH&S**  
The ergonomic, ultra-lightweight design of the Signet Bolt Wrapper boosts speed and performance while reducing wrapping fatigue and the risk of injuries
- Use with Signet Bolt Stretch Film (Item No. 21497)

1 + Wrappers \$167 <sup>89</sup>	3 + Wrappers \$155 <sup>29</sup>

# BLOWN VS CAST FILM

The type of pallet you’re wrapping can make all the difference to the type of stretch film you use. We’ve compared the pair to help you pick the best option to suit your application and ensure your pallet is properly contained.

## FILM PROPERTIES

Property	Blown Stretch Film	Cast Stretch Film
Clarity	Transparency suitable for product security. Available in different colours for colour coding	Crystal-clear, high transparency, ideal for scanning barcodes
Strength	Higher strength and durability	Moderate strength, more flexibility
Tear Resistance	High resistance to punctures and tears	Lower resistance to punctures, higher uniformity and clarity
Stretchability	More rigid and strong	Highly stretchable and flexible
Memory (Recoil)	Stronger memory maintains shape well	Conforms but retains little memory
Thickness Uniformity	Less uniform, slight variations	Highly uniform and consistent

## BEST USE CASES

Use	Blown Stretch Film	Cast Stretch Film
Containing heavy or sharp-edged loads	✓ Best suited (stronger resistance to tears and punctures)	Slightly thinner in its construction but durable in its application
High-speed pallet wrapping machines	Better suited for semi-automated machinery	✓ Ideal due to smooth unwinding
Clear contents visibility and barcode scanning	Hazier appearance due to its slower cooling process	✓ Ideal for applications where clarity is crucial
Cold storage or outdoor use	✓ Performs well in cold conditions	Less resistant to cold conditions
Cost-sensitive applications	Slightly higher in cost due to its heavy duty properties	✓ More cost-effective
Noise-sensitive environments	Noisier to apply	✓ Quieter unwinding

### Summary

Choose Blown Stretch Film if you need stronger load retention, tear resistance, or better performance in outdoor or cold conditions. Alternatively, if you need cost efficiency, high clarity, or a quieter, smoother application, then Cast Stretch Film will be the ideal choice.

# Nelson Pallet Wrapper

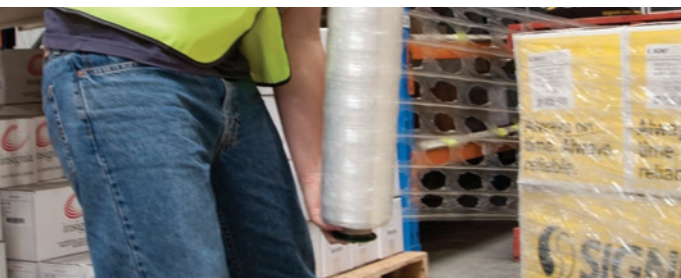

Item No. 33963

- Long handle design reduces the need to bend or reach when wrapping pallets at different heights
- Tension control handbrake ensures the tightest wrap is achieved
- Lightweight and ergonomic, operators can walk forward while wrapping
- Suits all of Signet's hand pallet wrap
- 50mm core width

Top end cap and tensioner fits neatly into the film core

PRICE EACH	SAVE 7.5%
1 + Wrappers <b>\$267<sup>89</sup></b>	4 + Wrappers <b>\$247<sup>80</sup></b>

# Heavy Duty Pallet Wrap Roll Holders

Item No. 11133

- Signet's Own premium, heavy duty pallet wrap holders
- Australian made for superior quality and better user experience than imported alternatives
- Suits 50mm roll cores
- Insert into pallet wrap ends for easy hand wrapping without a dispenser

PRICE PER ROLL	SAVE 7.5%
1 + Cartons <b>\$4<sup>17</sup></b>	5 + Cartons <b>\$3<sup>87</sup></b>

# OH&S Wrapping System

- OH&S Wrapper allows you to walk forward around the pallet which reduces the chance of injury
- Lightweight, with full roll and wrapper weighing less than 4kg, enabling easy operation
- Pallet wrap carton includes 2 x free roll holders

Film stretches by 50% ensuring maximum usage and consistent tension on the pallet

# Center West Exports

Signet helps WA carrot grower and distributor, Center West Exports, reduce their annual plastic usage by 28 tonnes, resulting in a 25% cost reduction.

Preparing produce for export while maintaining the highest quality during the transportation process is something Australian family-owned business, Center West Exports, has decades of experience in. Founder Frank Tedesco and his son, Francis, are continually looking for ways to improve their operations and reduce their business's environmental footprint.

Carrots require cool temperatures and good airflow to prevent quality and shelf-life depletion. In the Center West factory, the freshly picked produce is hydro-cooled, and the temperature is maintained throughout transport with the use of air-conditioners and carrot-specific packaging.

In mid-2018, Center West's third highest cost to the bottom line was their packaging. They had a clear vision about reducing their waste and turned to Signet to help them achieve this goal.

Through a Tertiary Packaging Optimisation Program, Signet was able to help Center West reduce their plastic consumption by 28 tonnes in one year, resulting in a 25% cost reduction.

Signet discovered that the over-wrapping of pallets with Ventilated Film meant increased freight, film cost and waste, plus it reduced the breathability and stability of the pallet.

Signet also identified that the plastic used to ensure moisture is maintained and the carrots remain clean in the cartons, could be thinner and smaller.

Center West Exports switched to **Signet's Orange Carton Liners**, which are made in Signet's HACCP approved flexibles manufacturing facility. By understanding Center West's packing process, Signet was able to optimise the size of the liners and materials used to manufacture them. This also reduced the plastic thickness by 30%, enhancing the product's performance all-round.

Signet implemented a new **Ventilated Film** and optimised the pallet wrapping procedure in Center West's factory. This improved load containment, increased airflow and removed excess wrapping.

*"Signet's experience and service is outstanding. They help us bring new technologies to the table, improve costs, product performance, and help us achieve our environmental goals."*  
– Francis Tedesco, Center West Exports Managing Director.

Signet is proud to support Center West Exports and over 60,000 other Aussie ventures.

# IN-HOUSE MANUFACTURING

Since 2001, Signet has been manufacturing flexibles at our in-house facility, ensuring reliability, efficiency, and outstanding value for our customers.

What began with a single extruder has evolved into a state-of-the-art operation, delivering innovative high-quality solutions nationwide.

**Signet's Own Pallet Caps**

Item No. 11190, see page 119

Signet's Pallet Caps protect your goods from rain, dirt, and environmental factors during transport and storage, ensuring products arrive in perfect condition. Use them in conjunction with pallet wrap for added security against theft.

**Signet's Own Blown Bundling Film**

Item No. 11197, see page 106

Signet's Blown Bundling Film stabilises pallets with ease. At 20um thick, it's lightweight, durable, and puncture-resistant, ideal for heavier, irregular loads. It sticks only to itself and works with Signet's dispenser (Item No. 11199).

**Signet's Own Blown Pallet Wrap**

Item No. 35595, see page 101

Signet's Own Blown Pallet Wrap is the ideal solution for securing heavy or irregular loads. With a durable 35um thickness and high puncture resistance, it ensures stability and reduces film usage with its high-tack formula.

Economical Shrink Packaging Kit

Item No. 21130

- Economical machine that allows for on-the-spot wrapping, heat sealing and shrinking
- Convenient 240V operation
- Size: 440mm × 680m × 150um
- Compatible with PVC Shrink Film (Item No. 10473, 10474, 10477, 10478, 10479).
- Please note: Film is not included with this kit

\$675<sup>55</sup>  
Each

ALLOW 5-7 DAYS FOR DELIVERY

Price includes delivery within metro Brisbane, Sydney and Melbourne only

Please note:

A freight charge may be applicable for delivery to other locations

PVC Shrink Film

- Excellent gloss and transparency to ensure labels and barcodes are easily identifiable during storage and transit
- High shrink at low temperature to reduce energy usage, particularly for high volume users
- Centrefold makes for more efficient handling and sealing

Customer Case Study

# Bundaberg Brewed Drinks

Through Signet's Tertiary Packaging Optimisation Program, Bundaberg Brewed Drinks eliminate transit damages, increase per roll usage by 37%, and reduce plastic waste by 30%.

Great Australian success story, Bundaberg Brewed Drinks, began manufacturing premium beverages from their family-owned brewery in 1968. Fast forward 50 years, Bundaberg has become a loved brand within Australia and around the world, exporting 75,000 pallets of product a year in over 3,000km of Signet's Stretch Film to 60 countries.

An increase in overseas exporting volumes was the catalyst for the team at Bundaberg to review their load containment process. The company wanted to find a solution that would successfully deliver their products in perfect condition, no matter the transport location or delivery method.

At the time, Bundaberg Brewed Drinks were experiencing movement in transit and cosmetic corner crush, which was affecting the packaging quality of their ready-to-sell products.

The company's incumbent supplier suggested more consumables to fix this problem, including cardboard corners and strapping. This would not only have been an increase in consumable expenses but also in labour costs associated with the extra packing time.

Signet took a different approach by supplying Bundaberg with a better performing film and adjusting their pallet wrap machine to ensure the right amount of tension was applied. Through machinery optimisation, Bundaberg was able to eliminate pallet corner crush and reduce transit damages.

"We had the right machinery, but we weren't utilising it properly to get the best results. Signet brought a wealth of knowledge and technology to identify the areas of improvement within our supply chain process." – Ronnie Curteis, Bundaberg Brewed Drinks Production Manager.

Signet switched Bundaberg from a 20um competitor film to their 17um **Platinum Film**. Using Signet's film, the company was able to go from wrapping 40 pallets per roll to 55, cutting costs and reducing plastic waste by 30%.

"We are literally stretching our money by wrapping an extra 15 pallets per roll and reducing the amount of wrap we are using in the process, so it is an all-round win-win!"

By optimising their tertiary packaging, Bundaberg reduced consumable costs, pallet wrap usage, and increased their load containment to improve the quality of the product being delivered to customers.

"We specialise in ginger beer; we don't make stretch wrap. So, we really rely on our suppliers to help us achieve the best possible outcome for our customers, and that is the reason why we enjoy working with Signet."

Signet is proud to support Bundaberg Brewed Drinks and over 60,000 other Aussie ventures.

## Platinum Machine Stretch Film

Signet's Platinum Machine Stretch Film range has been engineered with a complex blend of resins to guarantee superior performance. With **enhanced puncture and tear resistance, improved cling properties** for effective adhesion, and **increased clarity** for easy inventory management, our Platinum Machine Stretch Film optimises load stability and pallet security for all your handling and transport needs.

### Enhanced Performance

With **advanced puncture resistance and innovative tear technology**, Signet's Platinum Machine Stretch Film is designed to improve the security of your pallet load, minimising the risk of film failure when handling or during transit.

### Optimised Gauge

Available in a thinner gauge, Signet's Platinum Machine Stretch Film **requires less film when wrapping**, resulting in **significant cost savings** and a better yield compared to traditional films, while maintaining high load stability and integrity.

### Increased Efficiency

**Designed for high speed and high performance stand-alone and auto inline machines**, Signet's Platinum Machine Stretch Film can facilitate faster wrapping speeds thanks to its exceptional stretch. With extended roll lengths it **reduces roll changes and machine downtime**, enhancing overall wrapping efficiency.

- Ideal for high-speed machinery applications with high performance stand-alone and full auto in-line machines
- High clarity film for effective barcode scanning
- Ensures seamless wrapping with no stoppages or punctures

### Q300 Pallet Wrapper

Item No. 39233

- Recommended for pallet wrapping operations of 25 to 35 pallets per hour
- Turntable rotation with adjustable speed of 1–12 rpm
- Standard load capacity of up to 1800kg
- Standard wrap height of 2000mm, upgradable to 2800mm
- Maximises pallet wrap, with rolls stretched up to 200% – 1 metre on roll, 3 metres out
- Turntable diameter of 1650mm

### QL400XT Pallet Wrapper

Item No. 39236

- Patented XT Cut and Clamp® automatically captures the stretch film and cuts it at the end of the wrap cycle
- Turntable rotation with adjustable speed of 1–12 rpm
- Standard load capacity of up to 2200kg, upgradable to 3000kg capacity
- Standard wrap height of 2000mm, upgradable to 2800mm
- Maximises pallet wrap, with rolls stretched up to 250% – 1 metre on roll, 3.5 metres out
- Turntable diameter of 1650mm

For a quote, call Signet on **13 7446** or visit [signet.net.au/lantech](https://signet.net.au/lantech)

### Semi-Automatic Pallet Wrappers

Designed to reduce transit damage and increase productivity, Lantech's pallet wrappers have a variety of exclusive features to ensure a safe to ship load.

### Fully Automatic Pallet Wrappers

Designed for higher volume applications to improve workplace efficiency, automatic pallet wrappers require no operator intervention during the pallet wrapping cycle.

Cast Machine Pallet Wrap

- Excellent stretch and puncture resistance for application with all types of machines
- High-clarity film allows for easy scanning of barcodes
- Low noise film
- Single rolls are packed in individual cartons

Y-GEN-8 2000B  
Semi-Auto Stretch Wrapper

Item No. 99280

- Recommended for operations where users are wrapping 30+ pallets per day
- Adjustable turntable speed and film carriage speed
- 200% power pre-stretch capability turns each metre of film into three, reducing material costs
- User-friendly control panel is intuitive and easy to navigate
- Automatic film cutting delivers clean, precise cuts for maximum operational efficiency
- Diameter of turntable: 1500mm
- Mast height: 2700mm, suitable for pallet heights up to 2300mm

12 month warranty

Y-GEN-8 2000F  
Semi-Auto Stretch Wrapper

Item No. 8146

- Recommended for high-volume pallet wrapping operations
- Enhances efficiency by automatically cutting off wrapping when complete, eliminating the need for manual interaction during the process
- Wireless remote function available (this model is equipped with a small remote controller)
- Diameter of turntable: 1650mm
- Mast height: 2700mm, suitable for pallet heights up to 2300mm

12 month warranty

Y-GEN-8 2000A  
Semi-Auto Stretch Film Wrapper

Item No. 8144

- User-friendly pallet wrapper simplifies top and bottom wrapping
- Easily adjustable turntable and film carriage speeds for smooth up and down wrapping
- Diameter of turn table: 1500mm
- Mast Height: 2700mm max, suitable for pallet heights up to 2300mm
- Machine size: 2550mm (L) x 1500mm (W) x 2800mm (H)

12 month warranty

## Customer Case Study

# Capogreco Farms

**Signet's HACCP Mulch Film was the suitable choice for Capogreco as it provides maximum UV protection and chemical resistance.**

Proudly Australian owned and operated, WA local Capogreco Farms is a leading supplier of rockmelons and honeydew melons, cropping over 500 acres of melons and exporting to 12 countries.

In 2018, a Listeria outbreak had a detrimental effect on the rockmelon industry. While the issue was isolated to one farm in Griffith, NSW, the outbreak gutted the industry, hurting farmers thousands of kilometres from the source, including Capogreco Farms.

*"At the peak of the Listeria outbreak we lost 80% of our export market and had an overall 90% downturn in sales."* – Bruno Capogreco, Capogreco Farms Operations Manager.

In order to restore consumers' trust in the rockmelon industry, strict control measures were put in place for growers. Capogreco Farms partnered with Signet to help strengthen hygiene processes and ensure the highest standards of fresh food safety were achieved.

Capogreco Farms chose to use **Signet's Mulch Film** on its fields because of its

HACCP accreditation, which is unique from other mulch films on the market. Manufactured in Australia at Signet's local flexibles facility in Brisbane,

**Signet's Mulch Film** is specifically designed to cater to harsh Australian growing conditions. This makes it a suitable choice for Capogreco, as it provides maximum UV protection and chemical resistance while retaining soil moisture and minimising weed growth. Manufacturing this product onshore provides our customers with numerous benefits, including cost savings, product quality and stock level assurance.

*"Our HACCP manufactured Mulch Film is our point of difference within the market. Because our film is HACCP approved, it ensures that the quality of the product that is made matches the quality of the fruit that is produced on the farm."* – Chris Schmid, Signet WA Sales Executive.

The implementation of **Signet's HACCP approved Mulch Film** saw improvements for Capogreco Farms of 10% in sales and 15% in produce growth. Bruno Capogreco says Signet's products have enhanced processes from the field through to the production facility.

*"The team at Signet worked with us to provide a long-term solution to protect our brand integrity and achieve the highest standards of hygiene and food safety."*

The export market is stronger than ever for Capogreco Farms, exporting 240 tonnes of produce per week. To meet customer demands, produce is stored seven days a week at the airport, ensuring quick fulfillment of orders and a high level of customer satisfaction.

*"Signet stocks everything we need in their local warehouse, ensuring short lead times so we can get the job done. They deliver the best quality on-time to ensure we never experience downtime within our supply chain."*

– Dane Capogreco, Capogreco Farms Marketing Manager.

Signet is proud to support Capogreco Farms and over 60,000 other Aussie ventures.

# TERTIARY PACKAGING OPTIMISATION PROGRAM

Our Tertiary Packaging Optimisation Program enhances product protection and transport efficiency while streamlining handling processes. By evaluating key factors such as stacking capability, storage conditions, and transportation methods, we leverage our expertise in stretch film, wrapping equipment, and load containment to deliver tailored, sustainable improvements for each site's specific needs.

# The Hidden Costs of Poor Load Containment

# Measurable Benefits

## ADDRESSING UNDER PACKAGING:

- Fewer losses related to damaged merchandise or late delivery
- Lower return shipping costs
- Increased productivity and profitability
- Guaranteed coverage of your merchandise by major carriers
- Protected brand image

## ADDRESSING OVER PACKAGING:

- Considerable cost reductions
- Increased productivity and profitability
- Less waste of resources (packaging components, labour, energy, etc.)
- Reduced carbon footprint (less waste generated)
