

# Mail IT

**Family-owned mailing house Mail IT partners with Signet to source premium printing paper that outperforms the competition while reducing costs by over 20%.**

Mail IT has been delivering high-quality printing and mailing solutions in Brisbane for over 25 years. Founded and operated by a dedicated family team – Mike, Scott, and Glenn – Mail IT has built a reputation for its commitment to “right first-time service” and being a business that other printers will turn to for support. With over two decades of expertise, they understand how important it is to have reliable printer paper.

*“When you're printing five to six thousand sheets an hour, you can't afford to use a paper that will jam and won't feed through the machines properly. Having to stop and repeatedly reset the print could mean the difference between getting a job done on time and missing the deadline.”*  
– Scott Dennett, Manager Mail IT.

The team at Mail IT had relied on the same trusted printer paper for years, ensuring consistent print quality and smooth operations. However, when their go-to paper was discontinued,

they were forced to try alternative options – none of which met their standards. The replacements varied in texture, thickness, colour, and absorbency, leading to paper jams, inconsistent print quality, and increased downtime. These disruptions not only impacted their efficiency but also compromised the professional appearance of their printed materials.

Mail IT reached out to Signet who quickly introduced them to the **X-Brite A4 White Copy Paper**. The high-performing paper not only eliminated printer jams but also delivered a superior finish with a brighter appearance. The switch to X-Brite provided an immediate boost in productivity and print quality, ensuring Mail IT could continue to meet customer expectations with perfect prints every time.

The **X-Brite A4 White Copy Paper** is an excellent choice for both professional and home printing. With a bright white colour (160 CIE), it creates clear, high-quality documents. Plus, it's carbon neutral, PEFC certified, and meets ISO 14001 and ISO 9001 standards, making it a responsible and sustainable option.

*“We want to give our clients the best possible prints, and that usually means buying premium products at a higher cost. In this case, we are saving money and still getting a premium product.”*

With Signet's support, Mail IT has streamlined their printing operations, reduced costs by 20%, and elevated the quality of their printed materials. This partnership showcases how the right products can make a tangible difference in efficiency and bottom-line savings.

Signet is proud to support Mail IT and over 60,000 other Aussie ventures.
