

Customer Case Study

Kites 4 Kids

For over 28 years, Kites 4 Kids has used Signet’s Flagging Tape as a tool to spark creativity among students and add the perfect finishing touches to their handcrafted kites.

Kites 4 Kids began over 28 years ago, sparked by a holiday moment and a family’s shared sense of adventure. While on a trip to Queensland, the Baker family picked up a small stunt kite – and what started as a simple souvenir quickly turned into an obsession. Driven by determination (and more than a few tangled lines), they set out to master the art of kite flying together.

“We’d fly our kites in parks and teachers and passers-by would come up to us and ask if we would go into schools and teach kids about kite flying and how to make them.” – Jo Baker, Co-Founder of Kites 4 Kids.

Kites 4 Kids runs after-school workshops and in-school excursions, teaching people of all ages – from 3 to 93 – how to build their own kites, while also introducing them to the joy of this unique sport.

“Our mission at Kites 4 Kids is simple – to put smiles on kids’ faces from something

they handcrafted and to encourage more outdoor play. As a family business with kids of our own, that’s what we want for our children.”

Traditionally used in the surveying industry, Jo uses **Signet’s Flagging Tape** to create tails for her kites. The tape’s weatherproof and tear-resistant qualities ensure the tails stay intact while the kites are soaring through the sky.

As the business grew, Jo found that the local hardware store couldn’t keep up with the quantity she needed at an affordable price. Over two decades ago, Jo’s brother – a customer of Signet’s for his screen-printing business – recommended Signet, and their partnership has flourished ever since.

Today, Jo purchases over 6,000 rolls of **Flagging Tape** annually through Signet’s online store, taking advantage of bulk-buying price breaks that allow her to save nearly 50% compared to purchasing tape from a retail shop.

“While Kites 4 Kids doesn’t feel like a business for us, it’s important that we keep our costs down and that we always have the stock we need on hand for our students. Partnering with Signet has meant this isn’t a worry for us anymore.”

With a reliable and affordable supply of **Flagging Tape**, Jo can continue to share her passion for kite flying and building without the stress of stock shortages.

“We did a workshop yesterday with over one hundred Year Seven students who all made their own kites. It’s so great to see the pure joy the students get from flying their creations; it makes all the hard work worth it.”

Signet is proud to support Kites 4 Kids and over 60,000 other Aussie ventures.

Expand Your Safety. Control the Flow.

From warehouses to construction sites, airports to retail—effective crowd control and safety management are essential. Our high-performance belt and expanding barriers provide the flexibility you need to restrict access, manage pedestrian flow, and enhance workplace safety.

A PILOT 5 | A compact, versatile belt barrier with a 5m braked belt, 360° swivel base, and Twist-Lok connectivity. Ideal for quick deployment in warehouses, retail spaces, and industrial sites. Multiple mounting options available. Available upon request.

B PILOT 10 | A durable cone-mounted belt barrier designed for construction, airports, and events. Features a 10m retractable belt, adaptable mounting options, and high-visibility colors. Perfect for controlling pedestrian access in busy environments.

C PORT-A-GUARD | A lightweight, high-visibility expanding barrier extending 3m or 6m to restrict access to hazardous areas. Built with durable aluminum and plastic, it offers freestanding or wall-mounted use for versatile safety solutions.

D NEATA WALL MOUNT RETRACTABLE BELT | Perfect for queue management and access control, this durable PVC unit features a 5m or 10m retractable belt in red/white or black/yellow, ensuring flexibility for indoor and sheltered outdoor use.

Safety, simplified.
