## Custom Stencils

### STEP 1:

#### Choose the material you want

**Mylar:** A tough, lightweight, translucent polyester that gives stencil rollers better contact with the stencilling surface. Ideal for small characters or when you need to stencil onto a curved surface. Impervious to inks and most acids and chemicals.

**Blue Poly:** Made from tough, flexible polypropylene; stencils will not tear or kink. Ideal for long life stencils. Resistant to most chemicals.

### STEP 2:

#### Decide on your stencil layout

- Determine the overall size of the stencil first
- Decide how your message will read and if you need logos or artwork
- Choose the size of stencil characters for your message (minimum size 12mm, maximum 300mm)

### STEP 3

#### Email us today

- Simply visit [signet.net.au/custom](http://signet.net.au/custom) or email [sales@signet.net.au](mailto:sales@signet.net.au) to finalise your stencil details and price

# Oneshot

This Australian invention, developed by Signet, is one of the most significant improvements in stencilling. It is easy to carry and creates no mess to clean up afterwards.

### Signet Oneshot Applicators

- No mess, disposable ink cartridge acts as a handle that attaches to Oneshot Roller or Brush by piercing the membrane and allowing ink to flow
- Ink saturation is controlled by valve action pump to deliver just the right amount, creating no blotting or leaking
- Rollers and brushes come with cover to allow clean, easy storage without drying out

Oneshot makes stencilling easier!

Cartridge system eliminates spills and messy pads

Pistol pump controls the flow of ink to the roller

Bold, permanent marks on porous or non-porous surfaces

Convenient and portable for stencilling on remote sites

Oneshot

Developed by Signet in 1984, the Oneshot is still being used by Aussie businesses 36 years later. See how Murchison River Swags use it for a no-mess, stencilling application.
