# Inflatable Packaging System

**Sealed Air**  
Re-imagine™

**NewAir I.B.® Express**  
Inflatable Packaging System

- Versatile, inflatable cushioning system
- Quickly produces Barrier Bubble® material at 17m per minute in 400mm and 800mm film widths – fast enough to keep up with the most demanding packaging operations
- Allows for less material usage and promotes reusability

**Sealed Air**  
Re-imagine™

**Fill-Air® Rocket™**  
Inflatable Packaging System

- Super compact inflatable void fill system which fits on any bench top or standard table
- Lightweight at only 17kg means it can be easily moved where it's needed, or positioned in line within your product process for increased efficiency
- Produces up to 30m per minute of premium inflatable cushioning in a variety of sizes

Always a product to meet your needs:	Fill-Air® Rocket™	NewAir I.B.® Express

## Why is our earth in good hands when you use Ranpak paper as a packaging material?

### Climate neutral

Trees have the natural characteristic to absorb CO<sup>2</sup> in order to grow. The CO<sup>2</sup> that is emitted during the production and processing of paper is taken up by its natural source.

### The source is renewable

Trees can be replanted and therefore the source of paper will never run out.

### Recycling

The recycling rate of paper is around 60%. It is very easy to recycle paper and to make raw material out of it or other paper based products. Next to that, the separation and collection processes of old paper are very well established, both in domestic as well as in industrial segments.

### No hazardous substances

Ranpak paper is a very clean material and does not contain any threatening substances.

### Disposal

Ranpak paper is mainly used together with other paper based packaging materials, like cardboard boxes. This combination ensures easy disposal of the complete packaging set that in turn contributes to a higher recycling rate of packaging materials.

### FSC Guarantee

Ranpak only works with virgin paper suppliers that (FSC) ensures that the supplier manages the forests in such a way that the biodiversity, productivity and ecological processes are maintained.

# Ranpak®

# Sustainable, recyclable, biodegradable and eco-friendly packaging solution

### Environmentally friendly

All Ranpak packaging solutions are 100% recyclable, renewable and biodegradable.

### Cost-effective

Solutions that reduce packing time and materials, resulting in significant cost savings.

### Simple and effective

Easy-to-use, accommodating all types of packaging solutions: void filling, cushioning and wrapping.
