Helmet Care & Maintenance

FITTING

- ✓ Read the warning labels
- ✓ Fill in 'Name and Date Issued'
- ✓ Adjust harness for a snug and comfortable fit
- ✓ For windy or rough conditions, fit a chin strap
- ✓ Wear helmet type for best protection

CARE

- ✓ Wash with warm soapy water
- ✓ Use dishwashing brush for stubborn marks
- ✓ Wash harness separately
- ✓ Visual inspection weekly
- ✗ No harsh solvents or cleaning agents
- ✗ Avoid petrol, paint, adhesives and aerosol sprays
- ✗ No alterations
- ✗ No rough treatment
- ✗ Do not place objects between shell and harness

TIME TO REPLACE HELMET WHEN...

- ✓ Helmet has had a significant impact<sup>†</sup>
- ✓ Outer shell has dents, splits or cracking<sup>†</sup>
- ✓ Outer shell has excessively faded or is dull looking<sup>†</sup> (compare to inner surface)
- ✓ Harnesses should be replaced every 2 years<sup>†</sup>, or earlier if parts are broken, badly soiled or dirty

<sup>†</sup>(AS/NZS 1800:1998)

# Class Ratings for Ear Plugs

Australian Standards AS/NZS 1270:2002 divides protection into five classes: Class 1 (lowest) to Class 5 (highest). These classes are based on ‘Sound Level Conversion Ratings’ (SLC80) – the difference between the environment noise and the noise reaching the wearer’s ears.

Class	SLC80 Range	Workplace Noise Level
1	10–13	Less than 90 Decibels (dB)
2	14–17	90 to less than 95dB
3	18–21	95 to less than 100dB
4	22–25	100 to less than 105dB
5	26+	105 to less than 110dB

Signet.net.au carries a wide selection of hearing protection – from disposable ear plugs to active noise cancelling earmuffs – from the world’s leading manufacturers.

## One Touch™ Pro Ear Plug Dispenser

- Accurately dispenses one at a time
- Can be free-standing or wall-mounted
- Item 10290 – Class 3 protection, SLC80 = 21dB
- Dispenser and ear plugs sold separately

### Classification System

AS/NZS 1716 uses a classification system to identify the different types of contaminants captured. 3M™ Cartridges follow this marking and colour coding system:

	A	Organic Vapours (boiling point >65°C)
	AX	Organic Vapours (boiling point <65°C)
	B	Inorganic Gases
	E	Acid Gases
	K	Ammonia
	Hg	Mercury
	G	Organic Compounds with Low Vapour Pressure

### Filter Combo Packs

For protection against gases, vapours and particulates, a combination of gas and particulate filters is required. Use the 3M™ 501 retainer to attach the particulate filter to the cartridge, as shown:

45140 or 45141
